I started taking Strattera about 3 months ago. Prior to the medication, I would break into tears for no reason, constantly fight with those I loved, experience limited focus and concentration, did not have control over impulses, and was emotionally a wreck. Einigkeit und Recht und Freiheit If you care about having a gender, don't go near it. The information on this page has been compiled for use by healthcare practitioners and consumers in the United States and therefore neither Everyday Health or its licensor warrant that uses outside of the United States are appropriate, unless specifically indicated otherwise. It does make me thirsty and I have noticed a huge decrease in my appetite which I am not complaining about that one. If you have any questions about the drugs you are taking, check with your doctor, nurse or pharmacist. It was a wonder drug. The reason your access was limited is: Previous 9 of 32 Next. Please share your positive and negative experiences with the drug, and compare it with other treatments you have used. I started going into a depression and bad. I started with the usuall 40mg x 4d then 80mg thereafter. Slowly I turned into a moody, mean monster! If this is a false positive, meaning that your access to your own site has been limited incorrectly, then you will need to regain access to your site, go to the Wordfence "options" page, go to the section for Rate Limiting Rules and disable the rule that caused you to be blocked. Strattera combined with antidepressants and Lithium has made a huge difference in my quality of life. If you're still having trouble, then simply disable the Wordfence advanced blocking and you will still benefit from the other security features that Wordfence provides. Rated Strattera for Bipolar II disorder Report I have bipolar type 2 and have always struggled with focus when I was in a normal or manic mood was fine when depressed but never attended class and never did much at work when I am. Neither Everyday Health nor its licensors endorse drugs, diagnose patients or recommend therapy. Med and dose - Strattera 60 mg, 1x per day Time taking med - 6 mo Side effects - sick to stomach if taken without food, feel a little drunk for first few days Next step - Back to therapy, again.
