Much greater discounts will come next spring when more companies are allowed to sell low-priced versions of the drug. Thank you for subscribing. Other drugs expected to follow include Claritin, for allergies; Neurontin, for epilepsy; and Flovent, for asthma. View all New York Times newsletters. Any use of this site constitutes your agreement to the Terms and Conditions and Privacy Policy linked below. Under federal law, the first generic company to receive approval to sell a drug can do so exclusively for the first six months after a patent expires. Information is for End User's use only and may not be sold, redistributed or otherwise used for commercial purposes. This site complies with the HONcode standard for trustworthy health information: August 4, , Saturday A chart with the Market Place column in Business Day on Thursday, about a company that is about to begin selling a generic equivalent of Prozac, mislabeled the vertical bars representing growth in sales of generic prescriptions. Barr is one of the companies that the government has questioned. While Barr sells a generic version of tamoxifen, the medicine is still made by AstraZeneca and sells for only a slight discount from the brand-name drug. The questions concern Barr's deal with Zeneca, a company now known as AstraZeneca, on a breast cancer drug called tamoxifen. This content does not have an English version. All Barr needs now is final approval from the Food and Drug Administration. Mayo Clinic Marketplace Check out these best-sellers and special offers on books and newsletters from Mayo Clinic. Fluoxetine is used to treat depression, obsessive-compulsive disorder OCD , bulimia nervosa, premenstrual dysphoric disorder PMDD , and panic disorder. As more patents expire, some drug companies have become aggressive in trying to protect their products from generic competitors, many of which have recently become stronger after mergers and more able to take on the brand-name giants.
