Amitriptyline comes in tablet form, ranging from 10mg to mg per tablet. I know at the minute making every excuse possible not to leave the house and I know I'm not helping myself but every single day is a constant struggle good luck on your journey I wish you well x. Too many to mention my limbs got weak struggled to walk my eyes was out of focus but this could be anxiety not the meds as anxiety does this anyway. It can be taken on an empty stomach or with food. Amitriptyline is primarily used to treat major depressive disorder as well as other types of depression in adults and adolescents. Yes I hate being alone even in the house incase I pass out i hate it when my husband goes to work he works afternoons I wouldn't wish this horrid illness on my worse enemy Report this. And you to I hope it gets better for you I never want to be left on my own do u feel the same x Report this. Anxiety is a horrible thing I just can't wait to feel good and normal again instead of a racing heart feeling faint just basically like I'm dying horrible. Before you take amitriptyline, talk to your doctor about any and all current and past medical conditions. Are you on 10mg for anxiety Report this.He said he diagnosed myofascial disorder and prescribed Endep 10g and I couldn't believe the difference. No more waking up in a haze and feeling anxious. I have since had a difficult marriage break up to deal with and increased the dose to 25mg. I don't know how I would have coped without this drug. I hope to get back. Dec 31, - 7 Answers - Posted in: depression, anxiety, obsessive compulsive disorder - Answer: It may help. It has side effects too. I've been on it for more Does Elavil really help with panic attacks? Just starting on 10mg amitriptyline for terrible constant anxiety and panic attacks ive tried allsorts of AD to no avail I just want to feel better I suppose I'm a little scared sad I'm already dizzy and off balance due to the anxiety and don't want to feel worse how long does it take for this med to work for anxiety Amitriptyline 10mg causing more anxiety/flu like. MAOIs are medicines used to treat depression and symptoms of Parkinson's disease. Examples of MAOIs are phenelzine (Nardil), tranylcypromine (Parnate), moclobemide (eg. Aurorix, Arima) and selegiline (Eldepryl, Selgene). Do not take Endep if you are taking cisapride (Prepulsid), a medicine used to treat stomach. Amitriptyline received an overall rating of 8 out of 10 stars from 81 reviews. See what others have said about Amitriptyline, including the effectiveness, ease of use and side effects. Jul 13, - I've been googling already - I can't find a lot of info associated with anxiety with this medication. However I have found out it is used for depression, bedwetting, migraine, chronic pain, eating disorders, panic attacks, insomnia .. I know it is a tricyclic antidepressant, and I believe it is a much older drug than Amitriptyline dose increases and side effects. Amitriptyline is often used to treat insomnia even though it's approved as an antidepressant. How does it work to cure sleep disturbances? like amitriptyline gain new uses in popular medicine. Besides its alternative use as sleep aid, amitriptyline is also used to treat pain associated with a wide array of medical conditions. Fluoxetine versus amitriptyline in the treatment of major depression with associated anxiety (anxious depression): a double-blind comparison. Although common in clinical settings, major depressive disorder with associated anxious symptoms ('anxious depression') has not been well studied in antidepressant clinical trials. Apr 10, - Amitriptyline, Elavil, Endep is a tricyclic antidepressant used to treat depression and chronic pain. Usage, Dosage, Side Effects. Amitriptyline is used to relieve the chronic (long-term) pain of arthritis and related conditions. It relaxes muscles and improves sleep, and it may also help with anxiety or depression resulting from the pain.
