The H2 blockers work faster, while P. You agree to receive occasional updates and special offers for The New York Times's products and services. Does that mean it is not as effective as the others? Prilosec use should be limited to one day course every four months. And doctors say they work equally well for a great majority of patients. But such changes may not help people with severe GERD. Doctors often prescribe or recommend P. Five popular heartburn drugs work in essentially the same way, but only one of them, Prilosec, is sold without a prescription. An error has occurred. AstraZeneca also makes Prilosec, the best-selling prescription drug before it went over the counter less than two years ago. No, doctors say, Prilosec works just as well as the prescription drugs for most people - but only if they can get their hands on it. The pills are in such short supply that many drugstores are asking customers to wait two weeks or more for fresh stocks. Prilosec is approved by the Food and Drug Administration for self-treatment of frequent heartburn, which, if it occurs at least twice a week, falls under the definition of GERD. And even cheaper are changes in behavior, like cutting back on caffeine, nicotine, alcohol and spicy foods, avoiding eating within a few hours of bedtime and losing weight. But another alternative is to switch to less powerful and less expensive over-the-counter acid blockers like Zantac or Tagamet, or even old-fashioned antacids like Roloids and Pepto-Bismol, which doctors say offer relief to many people with mild to moderate heartburn. Insurers have begun pushing physicians to consider the cost. Only 2 to 3 percent of P. Compare Aciphex 20 mg prices from verified online pharmacies or local U.S pharmacies.
