The Company currently has two Phase 2 clinical-stage product candidates in development: About Biota Biota Pharmaceuticals, Inc. In addition to these clinical-stage programs, the Company has preclinical programs focused on developing treatments for respiratory syncytial virus RSV and gram-negative and multi-drug resistant bacterial infections. All of the above refers to flu drugs prescribed to healthy adults, i. Copyright Los Angeles Times. This press release contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of that involve known and unknown risks and uncertainties. Global fears over bird flu have sent sales soaring for an antiviral drug once dismissed as a commercial dud, but the two companies responsible for the drug are locked in a bitter court battle over profits. Posted by medconsumers on January 24, It involved as exhaustive search of all clinical trials, all of which were funded by the manufacturers. Roche, the Swiss company that makes Tamiflu, has failed to keep its pledge to make the full results of ten unpublished studies available to researchers, according to a press release e-mailed today from Tom Jefferson, MD, and colleagues at the Cochrane Collaboration, an independent, international organization that evaluates clinical trials. For additional information about the Company, please visit [www.BARDA](#) not terminating or significantly amending the Company's existing contract to develop laninamivir octanoate for the U. Posted in Chronic Conditions, influenza, unnecessary treatment Tagged: Before, Glaxo sold an average of, doses a year. A study published last year in the British medical journal The Lancet found Relenza was at least as effective as Tamiflu, and had fewer side effects, boosting Relenza's popularity even more. When studies show their product in an unfavorable light, some drug makers make sure the findings remain unpublished and therefore not subjected to critical review. Feb 3, - Underlying sales growth excludes pandemic products, Avandia and Valtrex, see page 9. By the end of, we expect Phase III data on around 15 additional assets, including treatments for type 1 and 2. Relenza sales were ? million (? million), down 84%, against the previous year. Feb 4, - The restructuring programme will save ?m by and be equally split between research and development and sales/administration costs. Glaxo's vaccines division was boosted by concern over swine flu, and sales of flu therapy Relenza rocketed from ?57m in to ?m in In total. But Relenza's sales never matched its competitor's. In, Relenza only gained \$13 million in revenue, compared to Tamiflu's \$ million in the first half. In a show of good will at the start of the H1N1 flu scare, Roche donated 30 million doses of Tamiflu to the World Health Organization stockpile, and the drug was widely Missing: Aug 30, - A Japanese report found 'potential for monitoring influenza activity and for providing early detection of infectious disease outbreaks' in an automatic surveillance system, monitoring prescription drug purchases of Oseltamivir, Zanamivir, and Laninamivir [17]. A quarterly review () published by National. Apr lungs. Antiviral drugs oseltamivir (Tamiflu) and zanamivir (Relenza) made big bucks for Roche and GSK respectively during the H1N1 influenza pandemic: Roche reportedly sold about \$3 billion of Tamiflu in Although sales have dropped off precipitously, the drugs are still recommended by CDC for. Oct 27, - From Rogaine hair-restoring treatment to influenza miracle drugs like Relenza, find out which high-priced, high-profile pharmaceuticals turned out to be catastrophic marketing failures And U.S. sales failed to grow despite the FDA's decision to let Upjohn market minoxidil as the prescription drug Rogaine. Apr 27, - Biota Holdings Ltd., which earns royalties on Relenza sales, jumped 82 percent today, the biggest gain since October, on speculation sales will gain as concerns mount that the flu may spread. Biota closed at A\$ in Sydney trading, valuing the Melbourne-based company at A\$ million (\$ Find all the information about Zanamivir (Relenza) for cell signaling research. More than US\$20 million worth of zanamivir sold by Glaxo in the first US season was returned to the company in the next two seasons because its sales to patients were far less than expected. 1 2 3 4 Jefferson, T.; Jones, M. A.; Doshi, P.; Del Mar, C. B.; Heneghan, C. J.; Hama, R.; Thompson, M. J. (Jan 18,). As Biota was a small company, it did not have the resources to bring zanamivir to market by itself. In, zanamivir patent rights were licensed to Glaxo, now GlaxoSmithKline (GSK). The license agreement entitled Biota to receive a 7% royalty on Glaxo's sales of zanamivir. In, the product was approved for marketing.
