Originally posted by Tialis For me codeine is so potent that I can get a good nod with about mg. I don't know his tolerance or anything but with my tolerance, no dose of codeine is going to give me a "potent nod". Realistically, you're not gonna park by the schoolyard in a clown costume, inviting kids into your ice-cream truck one at a time. When you've been in this business as long as I have, you learn to see the deeper subtext that lies beneath the surface of any given question. Still, you're hardly the first cash-strapped senior whose eyes have wandered from Breaking Bad to the medicine chest as the mental wheels began to turn. However, for someone who has been using opiates for awhile or have a moderate tolerance, more than likely are going to need a dose above mg to get off. Originally posted by karloff Why defend codeine? Hydrocodone, IMO, is a stronger buzz, more foggy, whereas dihydro seems to be more Most like the Hydros better though. Ok, the main problem with Codeine whether its T3s or T4s or a stand-alone codeine, these meds are not proportioned the correct way. Well, obviously 10mg of hydro is much much more stronger than T4s. Do you use this in conjunction with any other CNS depressants?Hydrocodone doses come in various forms, mixtures, and sizes; but on average the street price of a hydrocodone pill will range between \$4 and \$ A good source for knowing the street value of hydrocodone is to look at the website unahistoriafantastica.com The site contains anonymously submitted prices of drugs purchased on the.
