The indications, uses and warnings for individual medications outside the USA are determined by local regulatory bodies in each country or region. Every effort has been made to ensure that the information provided on this page is accurate, up-to-date and complete, but no guarantee is made to that effect. The placebo effect can give them a boost and research has shown that boost may be significant. As it turns out, we can't disregard the power the placebo effect has to influence how well a drug seems to work. And it's only hurting the customers. The flavor, color, and other inactive ingredients of generics don't need to be the same as in the brand-name version, but in terms of the way the drugs act in your body, they are identical. The easiest way to lookup drug information, identify pills, check interactions and set up your own personal medication records. But it's true for real drugs, too. The information on this page is not a substitute for the expertise, skill, knowledge and judgment of healthcare practitioners. That's true for fake medicines or placebos which patients frequently respond to when told they will ease pain or even stop asthma attacks. In one study in the British Medical Journal , women who received placebo pills labelled with a popular brand name for headache relief found them more effective than those who received the very same placebo pills labelled as a generic. The information contained herein is not intended to cover all possible uses, directions, precautions, warnings, drug interactions, allergic reactions, or adverse effects. A generic's active ingredient, dosage, and strength must be the same as its brand-name equivalent.

Medscape - Pain, fever, inflammation-specific dosing for Advil, Motrin (ibuprofen), frequency-based adverse effects, comprehensive interactions, contraindications, pregnancy & lactation schedules, and cost information. Generics often cost much less than brand name medicines. Examples of generic and brand name medicines. Brand Name. Generic Name. Tylenol, for pain or fever. Acetaminophen.
