But there have been less successful attempts too. Furthermore, GSK has launched no less than four different versions of its Imitrex migraine product. Less expensive generic alternatives were subsequently brought to market before patients could be swapped to Clarinex. The looming spectre of generics is one which no pharma company with successful medicines on the market can afford to ignore. According to the recent Reuters Business Insights report Generic Defence Strategies, a high percentage of reformulations will ultimately fail as a result of poor timing, inadequate promotional support or lack of competitive differentiation. IMS describes how pharma companies are working hard to ensure line extensions and next-generation products hit the market with sufficient time to begin transitioning patients to the newer medicine, before the generic wave hits. And AZ's aggressive defence of its successful brand has borne fruit with market success. Strategic product combination is another evergreening tactic which is rising in popularity. Time will then tell which tactics and strategies pay dividends, with Smith predicting "we will see the real stars emerge over the next five years". In recent years, the growth of the generics industry has been explosive, leaving the branded pharma business for dust. It seems that when it comes to getting ready for the generic war, you can never be too prepared. Some will simply fail because, although new, they fall short of being improved. However, Reuters adds that "legislative differences between countries have so far prevented this channel from being fully effective. What can I do to prevent this in the future? Although Merck's Mevacor and Bristol-Myers Squibb's Pravachol applications for US OTC status were initially rejected, the industry is acting rapidly to reverse this decision as many blockbuster statin products hurtle towards patent expiry. There is no doubt that drug delivery technologies have been seized on by pharma as a significant method of turning old into new and improved. For injectable products, common approaches to date have included: A generic version of Clarinex has been approved by the FDA. However, this does not mean that the product will necessarily be commercially available - possibly because of drug patents and/or drug exclusivity. The following products are equivalent to Clarinex and have been approved by the FDA. Generic drug availability, manufacturer information, and patent status on Clarinex-D 12 Hour. Clarinex is a drug marketed by Merck Sharp Dohme and is included in five NDAs. There are eight patents protecting this drug and four Paragraph IV challenges. This drug has thirty-three patent family members in twenty-eight countries. The generic ingredient in CLARINEX is desloratadine; pseudoephedrine sulfate. Compare prices and print coupons for Clarinex (Desloratadine) and other Allergic Rhinitis and Hives drugs at CVS, Walgreens, and other pharmacies. Prices start at \$ DOSAGE AND ADMINISTRATION. CLARINEX Tablets or Oral Solution may be taken without regard to meals. The age-appropriate dose of CLARINEX Oral Solution should be administered with a commercially available measuring dropper or syringe that is calibrated to deliver 2 mL and mL (? teaspoon). You can now buy types of Clarinex (desloratadine) in generic form. This eMedTV page gives an overview of the available strengths of the generic products, who makes them, and how they compares to the brand-name unahistoriafantastica.com: go. Jump to What else should I know about desloratadine? - Desloratadine (Clarinex, Clarinex Reditabs) is a medication used to treat allergies and hives (chronic urticaria) in adults and children 12 years of age and older. Side effects, drug interactions, warnings and precautions, and patient safety information should be Missing: go. Search Results for desloratadine (CLARINEX) We list this drug as a Do Not Use drug because it is merely a breakdown product, and no more safe and effective, than another drug that was losing patent However, if you use desloratadine in the short term before generic loratadine is available you will save money. IMPORTANT: HOW TO USE THIS INFORMATION: This is a summary and does NOT have all possible information about this product. This information does not assure that this product is safe, effective, or appropriate for you. This information is not individual medical advice and does not substitute for the advice of your health. Jan 1, - Last month, the patent for Claritin, Schering-Plough's blockbuster nonsedating antihistamine, ran out. This opened the door to competition not only from generics, but also from Schering's own over-the-counter version of loratadine. Yet, for some time, Schering has been working to convert physicians and.
