Thanks in advance, and don't hesitate to get in touch if you have any questions. Has your child's psychiatric diagnosis ever been changed? We would like people to tell us, in their own words, how they felt when the diagnosis was changed and whether it caused any difficulties for them. We hope to use the research to improve clinical communication of diagnostic changes and make the transition process easier for young people and their families. Sort by Latest Oldest. We are searching for families with a child whose psychiatric diagnosis has previously been changed, and who would be willing to tell us anonymously about their experiences. By contributing to this study, you will help improve our understanding of young people's experience of diagnostic changes and raise awareness of the challenges diagnostic changes can present. Despite the frequency with which this happens, no research has explored how young people and their families experience these diagnostic changes. We want to use this information to improve support to families during this potentially confusing time. I will explain the study and answer any questions you may have.
