They are beta-agonists, quite a different type of compound altogether. Working myself for a Biotech firm and being in this industry for the past 5 years, I can honestly say there IS a difference with some meds - but I do not feel that it would be fair to say that all generics are less efficacious. I have experienced this on 4 or 5 different occasions as well. They differ from one another in potency and duration; those that enter your brain most quickly Valium and Xanax can make you the most high. Benzos can also be extremely addictive, and their popularity can be gauged by their illegitimate uses as well. As far as good old fashioned Alprazolam, I wouldn't expect there to be a tremendous difference. Synthroid is a perfect example of this, as it is still widely used, despite the fact that it has gone off patent years ago. That could have just been a placebo effect though. Personally, the whole situation smells of conspiracy to me Drugs like inhalable cortico-steroids ventilin, albuterol, Aerobid, etc. Also, different fillers and binders used can affect absorption rates for the drugs generic methylphenidate isn't nearly as well absorbed as ritalin in a lot of people, for instance. And this is even if I am paying with my own money, it's not an insurance issue. I doubt it is, however, as the first time I got generic instead of brand name this was the first time I refilled my meds after starting to use Fiorinal for my cramps 5 years ago I didn't even KNOW that I was on generic. May 31, - But I will say this about brand name and generic. I noticed that not only did the generic work not anywhere as well as the brand name, it was slower to take effect. And that is not a good thing when anxiety or panic attacks strike you. I noticed that the real Xanax used to relieve symptoms in roughly 10 minutes. Jun 8, - Is Brand name Xanax stronger than Generic Xanax (Alprazolam)? I've taken name brand and generic Xanax (years ago) with no noticeable difference. . Funny, people who are diagnosed with such high levels of anxiety they need meds for it having anxiety over whether a generic is as good as a brand Drug info - - Which Xanax are the most potent? I had no idea there were that many different makers of generic xanax.. the pharmacy i used to get it at closed so i went to cvs and no lie the generic they sold me smelled like glue inside the bottle but i took it anyway and i noticed right away that it made me feel like i've never felt before and it wasn't good. However, there is absolutely no truth in these myths that generic drugs are manufactured in poorer-quality facilities or are inferior in quality to brand-name drugs. Many health regulatory bodies like the FDA and MHRA is a good place to start to learn some more Hope that helps build a foundation for things k Views. As for cost, it's not a "little more" unless you think multiplying cost by about 10 is a little. I doubt you're going to find many who've taken brand name Xanax as it's been generic for I think the last 16 years, so either they took it back in the day or they have money to burn. It's very unlikely that any insurance. Oct 19, - Hello everyone - I know a lot of people have wondered about the difference between brand and generic Xanax (alprazolam). take more. im trying not to take it but i feel like im already having withdrawal symptoms when im not on it. plus it makes me REALLY sleepy which is not good since ive been taking it. Oct 9, - However, in some instances, the Food and Drug Administration allows the generic drugs to contain dissimilar inactive ingredients not very much like the branded drugs are made up of. There are some instances when these inactive ingredients mixed with the generic Alprazolam produce undesirable. I was wondering if anyone has noticed any potency/quality differences in generic versus brand name alprazolam? One of my They tell me that unless I have a written prescription from my doctor that specifically says "no generic" then they are REQUIRED BY LAW to fill the prescription with generic meds. May 7, - However, only alprazolam and clonazepam (Klonopin) are approved by the FDA for the treatment of panic disorder, not lorazepam. Xanax comes in to 2 mg tablets as does the generic alprazolam. The extended release Xanax or the generic alprazolam XR comes in mg to 3 mg doses. I have been on xanax for over 20 years and have gone from 3mg. down to mg. and want to reduce further. I get themg. white pills scripted from my pdoc as I want to try breaking them; however, the pharmacy uses SANDOZ generic for years and I have had no problems with this except for my current.
