Multisource drug products listed under the same heading i. Abilify Rating User Reviews 6. At the end of that time period, any manufacturer that can prove that it can achieve the same drug concentrations in the blood that the brand name does can make a generic. Other people are just very sensitive to small changes in blood concentrations and notice a difference. Read more from Grandparents. Patent and Trademark Office and assigns exclusive legal right to the patent holder to protect the proprietary chemical formulation. Are generics really as effective? You can take it to the bank that that does not vary. The patent assigns exclusive legal right to the inventor or patent holder, and may include entities such as the drug brand name, trademark, product dosage form, ingredient formulation, or manufacturing process A patent usually expires 20 years from the date of filing, but can be variable based on many factors, including development of new formulations of the original chemical, and patent infringement litigation. Drug Exclusivity Exclusivity is the sole marketing rights granted by the FDA to a manufacturer upon the approval of a drug and may run simultaneously with a patent. Exclusivity is exclusive marketing rights granted by the FDA upon approval of a drug and can run concurrently with a patent or not. I strongly recommend that patients start out on generic medications or switch to generic medications if they are available, since they almost always work as well and can save people a lot of money. In very rare cases, we are left with only one generic manufacturer, so the generic is more expensive than the brand name. Aristada .
