We spoke with C. Call your doctor instead. In very rare cases, we are left with only one generic manufacturer, so the generic is more expensive than the brand name. With these, you need to talk to your physician about switching to generic, make sure you understand the risks and rewards, and that you are more closely monitored for the first couple of weeks afterwards. This is a bad corner to cut. I strongly recommend that patients start out on generic medications or switch to generic medications if they are available, since they almost always work as well and can save people a lot of money. Read more from Grandparents. Now I go over across town pharmacy B. Pharmacy A is cool. I get a script and once I ran out someone gave me a few of the zydus pills and I thought they were fake until I did a pill ID on them! It is assumed that if they can achieve same blood concentration, they will achieve same results. There has been a lot of debate about the use of generic drugs vs. Insurance companies may stipulate that you get a lower co-pay with generic than with a brand name even if brand name is less expensive. Why are brand names so much more expensive than generics? It usually means a different manufacturer has made that pill than the one you had before. Medications for seizures, heart arrhythmias, thyroid hormone, warfarin blood thinner, and lithium are all NTIs. For instance, theoretically, this is all subjective. The reason may be that while the blood concentrations of the brand name medication are very similar, what the tablets are made out of can vary. It is yellow, round and hard. According to the IMS Institute for Healthcare Informatics, generics have saved Americans one trillion dollars in health care savings over the past decade--a current rate of more than one billion dollars in savings every other day.
