Archived from the original on 6 January Archived PDF from the original on 13 December Retrieved 25 September Nat Rev Drug Discov. In , publication of the results of the Scandinavian Simvastatin Survival Study 4S provided the first unequivocal evidence that lowering LDL cholesterol via statin treatment reduces cardiovascular events and overall mortality. Pharmacy and pharmacology portal Medicine portal. Cochrane Database Syst Rev 8: The Story of Statins. The development of simvastatin was closely linked with lovastatin. In March , the FDA updated its guidance for statin users to address reports of memory loss, liver damage, increased blood sugar, development of type 2 diabetes , and muscle injury. These interactions are clinically important because increasing simvastatin serum levels above those normally provided by the maximum recommended dose increases the risk of muscle damage, including the otherwise rare and potentially fatal side effect of rhabdomyolysis. Views Read Edit View history. A combination of simvastatin along with ezetimibe is sold under the brand name Vytorin and is jointly marketed by Merck and Schering-Plough. Patients cannot breastfeed while on simvastatin due to potentially disrupting the infant's lipid metabolism.
