Also, the company gets a patent in order to protect the drug from being copied by other companies. Mayo Clinic does not endorse companies or products. This content does not have an English version. There are a number of generic Cardizem CD products available on the market right now. It is, now, marketed by some companies under its own generic name diltiazem and by other companies under brand names such as Cartia or Taztia. But, Celebrex is and will always be called a brand-name drug. The bottom line about FDA-approved generic drugs is that the active ingredient of generic drugs has no patent. The Food and Drug Administration FDA approved Celebrex as a brand-name drug because the manufacturing company demonstrated to the FDA that this drug had unique pharmacological and therapeutic characteristics. Would you like to view your HealthSavvy Programs now, or stay on this page and continue reading this article? Are There Foods for Type 2 Diabetes? The active ingredient of this drug is identified by the generic name celecoxib and, because of the patents, celecoxib is not a generic drug. As a result, this drug was granted several patents and, for about 20 years, the manufacturing company had been the only company making and selling this drug. This site does not dispense medical advice or advice of any kind. The patent for the active ingredient has expired. For example, Claritin is a brand name. Site users seeking medical advice about their specific situation should consult with their own physician.
