So in , in the name of liver safety, FDA asked companies to change their formulation , cutting back on the amount of acetaminophen in Vicodin-like products to mg or less per tablet. The acetaminophen component in this product is associated with liver toxicity when doses exceed more than 4 grams a day - even less in patients who also drink a lot of alcohol. Thus, it tends to be easier to write scrips for generic Vicodin than for any other opioid painkiller, including generic oxycodone products -- even combination ones like Percocet -- which fall under Schedule II. Kolodny spearheads the doctor organization Physicians for Responsible Opioid Prescribing, or PROP ; he says the group believes a schedule change is in order. Clark says the high prescribing rate for generic Vicodin is also a symptom of a larger, "decades-long" push to recognize that pain was undertreated -- an effort that he says began with opioids for cancer pain and pushed into chronic, non-cancer pain, largely under the influence of drug makers. That same year, the FDA recommends tighter warnings on drugs containing acetaminophen over liver-damage fears. While there are no solid figures on abuse of specific opioids, researchers say anecdotally that generic Vicodin accounts for a large part of prescription painkiller abuse -- although long-acting opioids, particularly extended-release oxycodone OxyContin , have been largely blamed for the nation's addiction woes because they contain more drug. Some were taking several tablets a day and even mixing in over-the-counter acetaminophen products, far exceeding the 4 gram limit. During a widely publicized briefing earlier this week, the Obama administration announced its plan to curb prescription painkiller abuse , which it has dubbed an "epidemic. Maximum Safe Daily Dose of Acetaminophen: Other manufacturers have jumped on the bandwagon since then so the mg product is now generic. Advertise Contact Us Permissions. The adult version arrives six years later. A warm, fuzzy Vicodin history:. Last week, a federal advisory panel recommended that Vicodin, one of the most popular and glamorous prescription painkillers, be banned.
