The only recall that I am aware of is the Europharm one in Hong Kong. If you become pregnant while taking this medication, contact your doctor immediately. Before you begin using a medication, be sure to inform your doctor of any medical conditions or allergies you may have, any medications you are taking, whether you are pregnant or breast-feeding, and any other significant facts about your health. A closer look at MS symptoms. Colchicine works by reducing the swelling, inflammation, and pain that occurs when uric acid crystals form in the joints. Lower or less frequent doses of colchicine may be needed. The side effects listed below are not experienced by everyone who takes this medication. Many of these side effects can be managed, and some may go away on their own over time. These factors may affect how you should use this medication. You only need to take action if the medicine was manufactured by Europharm Labs of Hong Kong. If you have severe conditions affecting the digestive system such as peptic ulcer or spastic colon, discuss with your doctor how this medication may affect your medical condition, how your medical condition may affect the dosing and effectiveness of this medication, and whether any special monitoring is needed.
