Mid-Level Providers in Practice As the demand for dermatologic services continues to grow, so does the use of non-physician clinicians in dermatology. Products meeting necessary bioequivalence requirements. If dermatologists decide against treating skin conditions with effective prescription medications, who will be capable of treating complicated conditions? This material is provided for educational purposes only and is not intended for medical advice, diagnosis or treatment. Biologic use beyond psoriasis. Two or more reference listed drugs are generally selected only when there are at least two potential reference drug products which are not bioequivalent to each other. A Reference Listed Drug RLD is an approved drug product to which new generic versions are compared to show that they are bioequivalent. If you purchase medications online, be sure you are buying from a reputable and valid online pharmacy. The patent assigns exclusive legal right to the inventor or patent holder, and may include entities such as the drug brand name, trademark, product dosage form, ingredient formulation, or manufacturing process A patent usually expires 20 years from the date of filing, but can be variable based on many factors, including development of new formulations of the original chemical, and patent infringement litigation. Ask your health care provider for advice if you are unsure about the online purchase of any medication.
