Valsartan blocks the actions of angiotensin II , which include constricting blood vessels and activating aldosterone , to reduce blood pressure. This material is provided for educational purposes only and is not intended for medical advice, diagnosis or treatment. If you choose this option, it cannot be undone, and you'll need to choose at least new topic to continue using your HealthSavvy programs. Two or more reference listed drugs are generally selected only when there are at least two potential reference drug products which are not bioequivalent to each other. Amlodipine and valsartan are combination drugs for hypertension. As valsartan acts at the receptor, it can provide more complete angiotensin II antagonism since angiotensin II is generated by other enzymes as well as ACE. A Reference Listed Drug RLD is an approved drug product to which new generic versions are compared to show that they are bioequivalent. Would you like to view your HealthSavvy Programs now, or stay on this page and continue reading this article?
