What if you could save that potential increase? These drugs were already very inexpensive. For instance, if you now take Pravachol for cholesterol control, the generic version called pravastatin is probably available for the deeply discounted price. Now they are available at retail without regard to health insurance, and that will help all of us maintain our health more cost effectively whether we have insurance or not. The Wal-Mart plan has spurred other retailers to create programs of their own. Are you willing to change pharmacies to save money on prescription drugs? Prices for generic drugs will not necessarily go down. The physician merely went to a closet in his office and supplied the request. The Wal-Mart program has alerted the general consumer to the fact that generic substitutes are valuable money savers. Even if you are not considering taking advantage of one of these retail generic drug plans, these tips can save you out-of-pocket expenses with your current health insurance program. Ask your physician about prescribing twice the dosage you need daily, and splitting the pill in half. Most insurance companies are detailing how you can obtain low cost substitutes for brand name prescription drugs, and are giving out valuable information that will make you a more informed health care consumer. At the very least you will be armed with more intelligent data before you talk with your doctor. If you have an insurance plan for your prescription drugs, check that plan again. Most milligram dosages cost the same as milligram. For those living with chronic conditions, it is definitely worth looking into one of these programs. And since most health insurance policies are increasing co-pays for drugs significantly, we all can benefit by considering one or more of the steps above.
