Generic drugs are not inferior to brand-name drugs. Now get out there and save some money. Basically, if you believe something will work, it often does. One should not drink any alcohol while on these drugs. Generic and store-brand drugs are just as rigorously tested, well-formulated, and effective as brand names. They are the exact same ingredients. As it turns out, we can't disregard the power the placebo effect has to influence how well a drug seems to work. This isn't just true of the drugs you buy in the aisle. Major companies pay for the marketing, advertising, and often development of a drug. If your doctor prescribes you a brand-name drug, you can ask for the generic if one is available, and it will work just as well. Generic drugs, both over-the-counter and prescription medications, are very strictly regulated by the Food and Drug Administration's FDA rules for generics. You agree that we have no liability for any damages. Generic drugs must be "bioequivalent" to brand-name drugs, meaning they have to show up as the same in the bloodstream and work in the exact same way. The cheaper price of store-brands is tempting, but we've all wondered: Mar 30, - Nor are all pills of ibuprofen the same. I prefer the original Advil brand to generic ibuprofen because, like a well-sourced cup of coffee, it works better at making my headaches go away. Yes, I know that both pills contain the same active pharmaceutical ingredient in the same amount, and I'm a sucker for my. Oct 3, - Different types of painkillers, all containing ibuprofen, were selected, and scientists from the pharmaceuticals laboratory at University College London devised a series of experiments. The first compared two well-known branded ibuprofen-containing products in the higher price category against three generic. Brand name drugs versus generics. When it comes to ibuprofen, there is considerable confusion about the effectiveness of brands such as Advil and Motrin compared to their generic equivalents. Is it worth paying the premium for the brand name products? Here is some information to help you decide. Aug 20, - These three medications are virtually identical in terms of their intended usage and effects. They all alleviate minor to moderate pain, fever and inflammation. They are suitable for the treatment of such conditions as headaches and migraines, men What's the difference between Advil and ibuprofen? Feb 22, - There has been a lot of debate about the use of generic drugs vs. brand names. Are generics really as effective? It pays to be informed since, according to the FDA, nearly 8 in 10 prescriptions filled in the United States are for generic drugs. The use of generic drugs is expected to grow over the next few. Feb 20, - Medicines may also have one or more brand names. The drug company that makes a medicine chooses a brand name that is usually easier to say and remember than the generic name. For example, Motrin is a brand name for a medicine used to treat pain. Its generic name is ibuprofen. Motrin was chosen. Feb 7, - Have you ever stood in front of a drugstore shelf with a splitting headache, Advil in one hand, store-brand ibuprofen in the other, cursing all the choices we have in our country? Active ingredient? Ibuprofen, ibuprofen. Dose in one tablet? mg, mg. Price? Depends on where you're at -- one shopper in. Perhaps the best example of a minimal performance difference despite a massive price discrepancy is the case of over-the-counter generic medications versus brand-name versions. To wit: You can get milligram Advil tablets for about \$11 or tablets of Walgreens-brand ibuprofen for \$ The difference. May 21, - A related but different case is compounded medications vs the brand name OR generic-- again, even though this is the exact same drug, there are many examples where the compounded Also check the expiry date - expired drugs don't work, as I learned once with ibuprofen and a bad headache. Jul 4, - "Let's just look and see if people who are well-informed about these things still pay extra to buy brands." In other words, do doctors, nurses and pharmacists pay extra for Tylenol instead of acetaminophen, or buy Advil instead of ibuprofen? Gentzkow and his colleagues looked at a huge dataset of over
