The company surveyed 1, people in 45 cities, according to Greg Allgood, a company spokesman. Sokolow said his company might impose a rule requiring any doctor who prescribes one of these drugs to get special permission from the health plan. Richard Evans, an analyst with Bernstein Research, said: But the relief does not come quickly. Millions more Americans will be affected this time. Such requirements often result in huge drops in sales. Events Guide Television Theater Video: Other prescription versions could be introduced later this year, when prices may fall sharply, but none will be sold over the counter for at least three years. Pepcid provides that relief, she said, but "Prilosec may not be suitable for episodic heartburn. Last year, more than three billion prescriptions were written for proton-pump inhibitors in the United States, according to data provided by NDCHealth. Even if permission is granted, the co-payments for these medicines could be raised above the cost of over-the-counter Prilosec. Dr. Patients who take similar drugs, like Nexium, Prevacid, Protonix and Aciphex, may soon find that their health insurers have made the medications more expensive or harder to obtain, managed care executives said. That may give health plans a freer hand to force patients to use over-the-counter Prilosec rather than the prescription versions. The company finally settled on a label saying the drug should be used by people who have heartburn at least two days a week, a description of about 54 million Americans, Mr. This content has not been reviewed within the past year and may not represent WebMD's most up-to-date information.
