Do not start, stop, or change the dose of any asthma medicine unless your doctor tells you to. The risk of serious heart problems eg, irregular heartbeat may be greater if you use Advair Diskus in high doses. It works by reducing inflammation and widening the airways in the lungs, which helps you breath more easily. Breathe in quickly and deeply through the device. If you are using other inhaled medicines, wait a few minutes between using Advair Diskus and other inhalers, unless directed otherwise by your doctor. If you have questions about side effects, contact your health care provider. Always ready and use this device in a level, flat position. Put the mouthpiece to your lips. Store Advair Diskus in a dry place. Advair Diskus is used for long-term treatment of asthma and chronic obstructive pulmonary disease COPD in certain patients. Use caution if you switch from an oral steroid eg, prednisone to Advair Diskus. If you have not had chickenpox, shingles, or measles, avoid contact with anyone who does. Push your thumb away from you as far as it will go until the mouthpiece appears and snaps into position. You will need to discuss the benefits and risks of using Advair Diskus while you are pregnant. Check with your doctor before you receive any vaccine while you are using Advair Diskus. Rinse your mouth with water after using Advair Diskus. Diabetes patients - Advair Diskus may affect your blood sugar. Pulmicort Budesonide is an anti-inflammatory medication corticosteroid used in the prevention of asthma. Advair Diskus may sometimes cause severe breathing problems right after you use a dose. It has the size of a normal protected envelope and it does not disclose its contents. Offer not valid for patients enrolled in Medicare, Medicaid, or other federal or state healthcare programs.
