Estrogen is present in the male body but in a relatively small quantity; due to steroids the level of estrogen increases. Nolvadex is also a useful agent against water retention. Steroid users also buy Nolvadex as it burns the body fat although no direct fat burning properties in this drug were noticed; it may be due to the anti estrogenic effects. Other side effects of Nolvadex include vomiting, nausea, numbness in the body, excessive sweating and hot flashes. Come sempre vi auguro una fruttuosa ricerca ma soprattutto una vacanza rilassante e divertente nella mia amata terra. The reason why body builders and other steroid users buy Nolvadex is because of its strong anti-estrogen properties. Estrogen is a female sex hormone which binds with the breast tissues in men and gets deposited on the location. Contrary to popular belief this SERM will not decrease the amount of estrogen in your body but it can block it more or less from causing a Gyno problem.
