Although both are prescription drugs, many people can find these sold on the streets. The National Institute of Health said 3 to 5 percent of people who take pain medication eventually become addicted. The effects of medications that are combined with oxycodone are released immediately after taking the pill. One-third of people aged 12 or older who used drugs for the first time used a prescription drug for a non-medical purpose. Global Mission 50 Years: This is a brand named pharmaceutical designed to be time-released and remains effective for about 12 hours. But with the introduction of OxyContin in , there has been a marked escalation of abuse. This destroys the time-release mechanism so that the user gets the full effects of the narcotic. Street names for OxyContin include: According to the U. OxyContin is arguably the most abused opioid in the US. Relief from pain may last for about 4 to 6 hours. Users compare the high to the euphoria of heroin. It makes you feel you can tolerate more, but it can precipitate respiratory failure, especially when used with other drugs like alcohol. Those who are addicted to prescription drugs usually prefer OxyContin because of the strong dosage, as compared to oxycodone. Jan 24, - 2 Answers - Posted in: percocet 10/, pain, chronic pain, brand - Answer: Jawsco; That is the stronger one if that is what you are taking and Best brand for percocet 10/?
