But it's downright depressing when your doctor, pharmacist and health insurance provider insist that you're wrong, that there is no difference between brand-name drugs and their generics, and that these side effects you're experiencing must be in your head. And I did some research. Many insurers won't cover brand-name drugs at all if there's a generic available. Budeprion users probably found bittersweet consolation in the lab's analysis of the little yellow pills. But it's downright depressing when. The FDA, in October, confirmed that it was investigating but has yet to issue a comment or findings. And it's really a drag when the medication you've been treating your depression with effectively for years suddenly leaves you feeling anxious, nauseated or even suicidal. You are, after all, "mentally ill. Seizure Led to FloJo's Death. Yet the true insanity lies in the way many medical professionals, convinced by the FDA, keep pushing the myth that "generic drugs are identical to their brand-name counterparts. It discovered that "generic bupropion XL released its ingredient at a very different rate than Wellbutrin XL. Even more of a drag? I'd done well on Zoloft in the past and had seemed to do all right when I was switched to a generic, but I'd only taken it for a few months before I went off the medication entirely. Generic drugs' hidden downside. When you realize those symptoms began when you switched from your brand-name antidepressant to its generic version. His scores make his case. I wrestled with this question a few months ago when my doctor prescribed Sertraline, a Zoloft generic, to treat my depression. Apr 29, - The Food and Drug Administration sees no difference between brand-name and generic medications for depression. The Difference Between Generic and Brand-Name Antidepressants. With somewhat older antidepressants, such as fluoxetine (Prozac), several different manufacturers make the. Oct 29, - I am starting to wonder about the effectiveness of my sertraline I was curious if anyone else has had a return of symptoms while taking sertraline vs Zoloft. Jennifer: Recently filled my Rx for generic sertraline and was informed the manufacturer changed (went from Greenstone to Aurobindo). I know from. Dec 10, - 4 Answers - Posted in: zoloft, sertraline, generic - Answer: There could be a difference big enough that would affect you. I've heard Anybody else find that Zoloft loses effectiveness after. Dec 17, - And it's really a drag when the medication you've been treating your depression with effectively for years suddenly leaves you feeling anxious, nauseated or even suicidal. Even more of a drag? When you realize those symptoms began when you switched from your brand-name antidepressant to its generic. I have in the past been given a generic brand of Sertraline instead of Zoloft, and it didn't take long for me to find out that taking a generic brand was not for me. The generic brand didn't seem to be effective for me at all, and I definitely felt terrible. Since then I have insisted on Zoloft and would not accept a generic brand which. I have had drowsiness & insomnia w/ the Aurobindo generic sertraline, but did not have that problem (as well as other miserable side effects like migraines & nausea) while taking the same dosage from Greenstone. I have reported my experience to the FDA. Yes, it was THAT bad. After 4 days of sleepy, but. Zoloft (sertraline generic) is a prescription drug used to treat depression, obsessive-compulsive disorder, panic disorder, PTSD, social anxiety disorder, and PMDD. Common side effects are dizziness, insomnia, nervousness, and sleepiness. Drug interactions and pregnancy and breastfeeding safety information are. Not asking for medical advice just wondering if anyone has any experience with generic Zoloft? I've been on Zoloft for 8 years. It has helped me to live a normal life. I know that generics are. How much sertraline is in a dose, what excipients are used, what color the pills or liquid might be, how much a pharmacy is charging, and how effective a patient finds the drug CAN differ between Zoloft and generic forms sometimes marketed simply as Sertraline. Though there is the general expectation that people will. Lots of us take Sertraline but what we do not realise is many of the side effects may be caused by taking a generic version of the drug as opposed to the . what is unahistoriafantastica.com to demand something (which may be out of character) or potentially suffering the "side effects" of a generic, non-effective brand?
