Because "the term 'generic' evokes a poor product quality," suggest the authors of a essay , "it can subsequently reduce the placebo contribution to therapeutic efficacy. Vicoprofen , Ibudone , Reprexain , Xylon 10 Drug class es: That's true for fake medicines or placebos which patients frequently respond to when told they will ease pain or even stop asthma attacks. Basically, if you believe something will work, it often does. Bronnenberg et al You have to believe Generics are a can't-miss bargain, and all you're paying for when you buy a brand-name drug is the pretty package, familiar name, and trusty slogan. When asked why, participants said they thought generics would "require higher doses" and "result in more side effects. Generic and store-brand drugs are just as rigorously tested, well-formulated, and effective as brand names. In a CDC study of a rural Alabama community, investigators found that people resisted buying generics, even when they were strapped for cash. It turns out all those ads really do have an impact what researchers call "the possible influence of the marketing to patient's response. The absence of a warning for a given drug or drug combination in no way should be construed to indicate that a drug or drug combination is safe, effective or appropriate for any given patient. As it turns out, we can't disregard the power the placebo effect has to influence how well a drug seems to work. Generics often cost much less than brand name medicines. Examples of generic and brand name medicines. Brand Name. Generic Name. Tylenol, for pain or fever. Acetaminophen. Motrin or Advil, for pain, fever or inflammation. Ibuprofen.
