Election workers wanted for the student union elections ! Captopril Rentiapril Zofenopril Dicarboxylate-containing: Recruitment of Generals for Insparken ! In one study of people without diabetes, valsartan reduced the risk of developing diabetes mellitus over amlodipine , mainly for those with hypertensive. In people with type II diabetes and high blood pressure or albumin in the urine , valsartan is used to slow the worsening and the development end-stage renal disease. It is an angiotensin II receptor antagonist commonly called an ARB, or angiotensin receptor blocker , that is selective for the type I AT 1 angiotensin receptor. Amlodipine and valsartan are combination drugs for hypertension. Please read before your first appointment at our office. For who have diabetes or kidney disease the combination drugs cannot be given with medication that contains aliskiren. Valsartan trade name Diovan is mainly used for treatment of high blood pressure , congestive heart failure , and to increase the chances of living longer after a heart attack.
