Press "Continue" button below to begin selecting your HealthSavvy topics. Patent and Trademark Office and assigns exclusive legal right to the patent holder to protect the proprietary chemical formulation. To view content sources and attributions, please refer to our editorial policy. Ask your health care provider for advice if you are unsure about the online purchase of any medication. It is available in the following strengths: Available for Android and iOS devices. A Reference Listed Drug RLD is an approved drug product to which new generic versions are compared to show that they are bioequivalent. Remember, you need at least one selected topic to use HealthSavvy. Three strengths are available, all of which are made by Glenmark Generics. All generic medications must undergo certain tests to compare them to brand-name medications. You've chosen to add topics from the topic group to your selected topics. Are you still sure that you want to clear all of your selected topics? Calcium channel blocking agents Group IV antiarrhythmics. Are you sure you want to add all of these topics? In order for us to create your customized HealthSavvy programs, we need a little more information about the health topics that you are interested in. By designating a single reference listed drug as the standard to which all generic versions must be shown to be bioequivalent, FDA hopes to avoid possible significant variations among generic drugs and their brand name counterpart. Food and Drug Administration FDA then looks at these tests to decide if the generics are equivalent to the brand-name medications and assigns a rating to each one. However, generic medications are allowed to have different inactive ingredients than the brand-name medication. Generic Calan SR, Verelan.
