Mon Sep 26, 1: No registered users and 0 guests. Page 1 of 1. I have had fecal checks done over the years and we have been basically worm-free. It is currently Thu Mar 08, 3: If you put the liquid down a horse's throat, it absorbs through the intestine and is metabolized by the liver before it can reach a high enough concentration in the bloodstream to kill off the parasites. No more squirting it all over my hands. Injectable ivermectin hurts like a sonofagun. Back to Pedigree Query. Mon Sep 26, 6: He took periodic fecal tests and said they came up excellent every time. The paste is absorbed slower, and the liver takes longer to break it down so there's enough in the bloodstream to kill the parasites. Noromectin is the generic form of Ivermectin and is much cheaper. Sun Sep 25, 8: This is my experience, been doing this for over 25 years. Users browsing this forum: I can't remember the exact reason why you don't use the injectable on the horses the injectable concentration is toxic to the horse, or you can't reach a high enough concentration with the injectable or something , but I was taught not to do it based on the "ouch" factor alone. You draw it into a syringe, 1 cc for every lbs. I've never seen the injectable used on horses - just the liquid used in an oral dose. Order by 4 PM (CST) and we'll ship same business day Generic Ivermectin Dewormer (1% Ivermectin Injectable) Cattle and Swine Wormer for the treatment and control of gastrointestinal roundworms, lungworms, grubs, and ectoparasites, horn So in reality it would have been cheaper for me to buy the Ivomec brand.
