Tried also another one and this one was more effective. Care must be taken to avoid applying the Cream to areas close to the eyes. Children between 2 months and 2 years should only be treated under medical supervision. If you are in doubt about the success of treatment, talk to your doctor. It works by binding to a particular site sodium channels on nerve endings. Please read the instructions that come with the treatment to ensure it is used safely and correctly. Pay particular attention to the areas between the fingers and toes including under the finger and toe nails , wrists, arm-pits, external genitals and buttocks. Apply over whole body except face and head in adults and children over 2 years. Sign up to our newsletter and get the latest deals, exclusive offers, health advice from our online doctor and much more. Adults and children over 2 years old should apply the cream to the skin over the whole body including the palms and soles, but not the head and face. Repeat once if necessary after 7 days. If the contents of the tube are swallowed by a child, talk to your doctor immediately. The treatment of eczematous-like reactions with corticosteroids should be withheld prior to treatment with the Cream, as there is a risk of exacerbating the scabies infestation by reducing the immune response to the mite. In the event of eye contamination, rinse with water immediately. Yes No Report abuse.Buy PERMITE 5% 30GM CREAM(CURATIO) with a composition(formula) of Permethrin 5 %W/V at MRP of RS Also view other alternatives.
