Half of the "patients" asked for oxycodone specifically, and the other half didn't. Doctors need to increase their awareness Andrea Cooper, 52, of Phoenix, Md. This group of "patients" claiming to have seen ads for the anti-inflammatory drug saw similar results: Many doctors are concerned that there is a limit on how much they can prescribe in the course of their practice legally there isn't, and if they fear their total number of prescriptions has gotten too high, they may cut back on refilling or writing new prescriptions. Painkillers such as oxycodone also aren't recommended for newly presenting cases of sciatica either, which is what was shown in the videos. The idea that patients' suggestions could influence doctors to prescribe things against their best judgment is especially troubling considering the recent spike in pain pill abuse. The study To determine whether patients could influence their doctors' prescribing practices, primary care physicians from six states viewed videos in which professional actors simulated a consultation with a primary care doctor. Not the way medicine ought to be practiced. Together, the findings suggest that some doctors are easily swayed by patients even when prescribing narcotics that are prone to abuse and that pharmaceutical advertisements targeted at patients may actually affect what doctors prescribe. Physician and Duke behavioral scientist Peter Ubel, who wrote a book about how patients can work with their doctors to make medical decisions, told Business Insider that this shows a problem with medical training. Some doctors require a narcotics contract It's a tricky balance. The wording of the patients' request for oxycodone was rather unnerving. The study also included actor-patients who requested the drug Celebrex for their osteoarthritis. The actors described symptoms that suggest sciatica, or back and leg pain that could be caused by nerve damage. Doctors need to monitor their patients to ensure there's no wrongdoing, while patients with a legitimate need want to ensure a continuing supply of meds. I found it insulting.
