Reviews and ratings for paxil when used in the treatment of panic disorder. 64 reviews submitted. Reviews and ratings for paroxetine when used in the treatment of panic disorder. 90 reviews submitted. Hello, new to the group here Glad I found this, I have read a lot of good advice and would like to share what I am going through now and what I have been through. I am 45yr old and having fighting this illness for a very long time. The down fall i am having is things seem to be worse now more then they. Paroxetine (Paxil), the first SSRI to obtain a licence for PD by the US Food & Drug Administration, is generally well tolerated, safe, and has proven efficacy in treating conditions such as depression and obsessive compulsive disorder (OCD). This article reviews the efficacy of Paroxetine in the treatment of panic disorder. Hi everybody. I have recently started Paxil for my severe anxiety and panic attacks and I am just wondering if anybody who has tried it/is currently using it has.

1 Jun For panic disorder, high potency benzodiazepines are effective for acute and long-term treatment, but have the disadvantages of sedation, drug interactions and . For example, with paroxetine a common antidepressant dose is 20 mg/day while the dose is 40 mg/day or more for panic disorder. mad: I was just about to give up on meds altogether but as my anxiety and panic disorder continues to get worse, even with CBT therapy, I feel I want to give this med a try and hopefully third times a charm!!! I just took my first pill about an hour ago, so I have nothing to report except for increased anxiety.

18 Jan Both Paxil (paroxetine) and Zoloft (sertraline) work well for panic disorder, and both are classified as SSRIs, or selective serotonin reuptake inhibitors. Both are well-tolerated and not as activating (induce agitation and anxiety) as Prozac (fluoxetine), another SSRI. In addition, Paxil and Zoloft are not as.
