Home About Narconon Narconon: Site Navigation Who We Are. One-third of people aged 12 or older who used drugs for the first time used a prescription drug for a non-medical purpose. OxyContin has stronger effects because it contains a pure concentration of oxycodone and the formulation makes the drug intensely strong and highly addictive. Oxycodone acts on the central nervous system CNS to relieve pain. However, people who have continuing pain should not let the fear of dependence keep them from using narcotics to relieve their pain. A number of prescription pain relievers including Percocet , Percodan, Tylox and OxyContin all contain oxycodone. Do not use this medicine to relieve mild pain, or in situations when non-narcotic medication is effective. This content does not have an Arabic version. Information is for End User's use only and may not be sold, redistributed or otherwise used for commercial purposes. Mental dependence addiction is not likely to occur when narcotics are used for this purpose. It comes in tablet form. Narconon and the Narconon logo are trademarks and service marks owned by the Association for Better Living and Education International and are used with its permission. Advertising revenue supports our not-for-profit mission. It is still an opiate but may be combined with ibuprofen or Tylenol in some formulations.
