For example, if this website is www. This page is used to test the proper operation of the Apache HTTP server after it has been installed. Sign In to Your Account. This loss in vision may also occur if you are over 50 years of age and in the habit of smoking regularly. Consuming alcohol has been known to aggravate certain side effects associated with the usage of Levitra. Levitra is a medicinal drug that belongs to a class of drugs called phosphodiesterase inhibitors. The above however is not an exclusive list and there are other drugs which should not be used simultaneously and concurrently with Levitra. If you exhibit allergic reactions to Levitra such as:. Also, you should not use any other drug for treating impotence, such as yohimbine and alprostadil while you are already on Levitra. Since Levitra is administered as and when required, it is unlikely that you will be following a dosing schedule with regards to the drug. A generic form of Levitra may become available in It is not covered by most Medicare and insurance plans, but manufacturer and pharmacy coupons can help offset the cost. The lowest GoodRx price for the most common version of Levitra is around \$, 13% off the average retail price of \$ Compare PDE5. Nov 12, - Levitra was the second of the big three drugs for erectile dysfunction (ED) introduced in the United States. Levitra works similarly to the other two main ED drugs sold in the U.S., Viagra and Cialis, in that it is a PDE5 inhibitor. The prices for Viagra and Cialis today are. Be careful not to take Levitra more than once every 24 hours and allow at least one day between consecutive dosages. Should your erection be painful or last for a prolonged period of time (beyond 4 hours) you should get medical attention immediately.
