I do really well at mgs per day. Remember to always consult your physician or health care provider before starting, stopping, or altering a treatment or health care regimen. I like my mania so I went up my dose. I hope you have the same success I have had. I have been taking this for about 3 months now. Never want to go through that again. Just hope this med continues to work for a very long time. As someone with an incredible amount of patience, this is quite unusual. I love this medication. How effective was this drug in treating your condition? This dulled down version of myself is certainly preferable to self-hatred and extreme depression, but I miss my highs. Now I can honestly say that I feel normal again, and the depression is gone. Initially I had headaches, lasting about a week, following each increase in dose, which were annoying, but bearable. I have been having non-stop panic attacks for about three weeks now. I'm still at 25mg and my mood has not had any improvements. My psychiatrist seems to think I just need a mood stabilizer but I'm seriously considering requesting klonopin or something 'cause I'm having the worst panic attacks I've ever had in my life What can I do to prevent this in the future? Has great anti-depressant properties and levels out my mood swings. I've had some moments of severe confusion, I wandered around a store aimlessly for nearly an hour. Even though I'm on Adderall for ADD and it's always done wonders for my concentration, on Lamital, I find it very hard to clear my mind enough to get anything done. Reviews and ratings for lamotrigine when used in the treatment of borderline personality disorder. 25 reviews submitted. Sep 16, - Affective instability among people with borderline personality disorder has led to interest in the role of mood stabilisers (sodium valproate, lamotrigine, that drug treatments should not be used for borderline personality disorder or for the individual symptoms or behaviour associated with the disorder. Sep 12, - There are many studies about efficacy of valproate and lamotrigine in treatment of borderline personality disorder. However, findings related to other mood . Additionally efficacies of mood stabilizers and atypical antipsychotics used in psychopharmacological treatment of BPD will also be discussed. Go to.
