What it really comes down to is this: Enterhealth offers a science-based alcohol and drug addiction treatment program created by a dedicated team of addiction experts determined to dramatically improve treatment outcomes. Both issues, addiction and eating disorders, also present with many of the same comorbidities, which can include: Based on the latest NIH research identifying addiction as a chronic brain disease, this program is implemented by a full-time staff of addiction-trained physicians, psychiatrists, nurses and therapists, beginning with a thorough medical and psychological assessment designed to create a personalized treatment plan for each patient. Additionally, media such as TV and film tend to glamorize drug and alcohol use and frequently present people with unrealistic expectations of beauty and the human body. We address the two disorders with a very personal, integrated approach. Calls to any general helpline non-facility specific XX numbers for your visit IP: Let me repeat that. Subscribe to this post. Eating Disorders and Addiction: Enterhealth also specializes in treating drug and alcohol addiction with Co-Occurring issues such as mental illness or eating disorders, otherwise known as Dual Diagnosis Treatment. Click here to cancel reply. This is likely a result of several factors, including the tendency of young adults to be exposed to more societal expectations and pressures than older adults. Urschel is Co-Founder and Chief Medical Strategist for Enterhealth , one of the finest residential and outpatient treatment programs in the nation. Is There a Connection? What the public needs to know is that eating disorders can have the same effects, both on the body and the brain. According to the National Institutes of Health NIH , addiction and eating disorders are identified as chronic brain diseases.FIND Medication HELP for Eating Disorders - Anorexia, Bulimia, Binge Eating, Obesity and other eating disorders.
