Measure Zantac liquid with a special dose-measuring spoon or cup, not a regular table spoon. Heartburn is often confused with the first symptoms of a heart attack. Zantac Rating 23 User Reviews 8. Zantac is not expected to be harmful to an unborn baby. The easiest way to lookup drug information, identify pills, check interactions and set up your own personal medication records. It also treats conditions in which the stomach produces too much acid, such as Zollinger-Ellison syndrome. Allow the Zantac effervescent tablet to dissolve completely in the water, and then drink the entire mixture. To view content sources and attributions, please refer to our editorial policy. Zantac is used to treat and prevent ulcers in the stomach and intestines. Stop using Zantac and get emergency medical help if you have any of these signs of an allergic reaction to Zantac: The Zantac effervescent tablet may contain phenylalanine. Talk with your doctor if your symptoms do not improve after 6 weeks of treatment. If you do not have a dose-measuring device, ask your pharmacist for one. This medication can cause unusual results with certain medical tests.

Feb 13, - Recent reports of serious side effects associated with PPIs have some people looking for alternatives that will still treat their heartburn. Like cimetidine (Tagamet) and famotidine (Pepcid), it blocks stomach acid production through a different mechanism. Related People's Pharmacy Health Guide. Jan 25, - Now you can buy Nexium 24HR, Prevacid24HR and Prilosec OTC in any drugstore without a prescription. Many doctors remain convinced that these PPIs are among the safest drugs in the pharmacy. It also seems hard for the FDA to embrace the idea that there are serious heartburn drug dangers and that.

Jun 13, - I quit taking Nexium and switched to Zantac. It did not work as well as the PPI but I managed my heartburn with Tums in the afternoon and evening. After reading your article on coconut water for heartburn, I started drinking a rather small amount. The results have been excellent. Even after cutting my Zantac.

Nov 10, - The assumption has been-no acid, no damage. In addition to curing ulcers and preventing heartburn, drugs like esomeprazole (Nexium), lansoprazole (Prevacid), omeprazole (Prilosec), pantoprazole (Protonix) or rabeprazole (Aciphex) were supposed to keep Barrett's esophagus from developing into.

Feb 16, - Most pharmacies now prominently display Nexium 24HR, Prevacid24HR and Prilosec OTC. The warning on such products states that they should not be used for more than two weeks and no more often than every four months. The FDA may believe that this will protect consumers from adverse effects such.

Feb 22, - When proton pump inhibitor (PPI) drugs were first introduced decades ago, the perception was that these drugs had hardly any side effects. Both doctors and their patients were convinced that omeprazole (Prilosec), the first PPI, was both very powerful and extremely safe. This view has held up well enough.

Sep 14, - Acid reflux, or gastro-esophageal reflux disease (GERD), can be terribly painful, and it is often a chronic problem. Millions of people take PPI (proton pump inhibitor) medications such as lansoprazole (Prevacid), omeprazole (Prilosec) or pantoprazole (Protonix) to keep the stomach from over-secreting acid.

Apr 1, - Overview. Tritec is prescribed together with Biaxin to eliminate the germs often responsible for ulcers, Helicobacter pylori. It works in part by suppressing the secretion of stomach acid, but the combination of bismuth with the antibiotic also works to eradicate the bacteria. One month of therapy with Tritec (the.

Aug 17, - Last year over 80 million prescriptions were dispensed for powerful acid-suppressing drugs such as Aciphex, Nexium, omeprazole, Prevacid and Protonix. That doesn't even count the millions of doses of Prilosec OTC that were purchased without a doctor's supervision. This makes these proton pump. The following side effects have been reported by at least 1% of people taking this medication. Many of these side effects can be managed, and some may go away on their own over time. Contact your doctor if you experience these side effects and they are severe or bothersome. Your pharmacist may be able to advise you.
