Keeping track of OSHA's Standard Interpretations, published regularly on their website, can help clarify what is considered as first aid and what is not as well as keep you abreast of changes in the agency's classifications. That interpretation changed in July, classifying kinesiotaping as a non-rigid means of support that qualifies as first aid. Deborah Lechner, ErgoScience President, combines an extensive research background with plus years of clinical experience. The Well Workplace Blog. OSHA defines work-related injuries, illnesses, and fatalities are those in which an event or exposure in the work environment either caused, or contributed to, the condition. How, then, should employers make accurate determinations as to what constitutes a first-aid injury and what is a recordable incident? Written by Deborah Lechner Deborah Lechner, ErgoScience President, combines an extensive research background with plus years of clinical experience. First Aid Incidents vs. Under her leadership, ErgoScience continues to use the science of work to improve workplace safety, productivity and profitability. OSHA regulations require employers to prepare and maintain records of serious occupational injuries and illnesses. Sign up for our blog to stay up to date with the latest Employer news. However, job-specific exercises ones that anyone doing the job should be doing to prevent injury would not be classified as medical treatment. They are classified as physical therapy, which constitutes medical treatment. However, while compresses, soaking, and non-prescription skin creams or lotions that produce a localized heating affect are first aid, more advanced heat therapies, such as whirlpool treatments or ultrasound treatments are not. However, the assignment of specific exercises designed to address that discomfort is, according to OSHA, considered physical therapy, which is classified as medical treatment and would create an obligation to record.- All prescription medications, including preventive antibiotics, should be considered medical treatment and are recordable. [03/10/]; - Clarification of a pre-existing injury or illness and recordable events [02/28/]; - Clarification of several recordkeeping scenarios regarding the use of.
