This is a racemate, i. As these drugs have grown in popularity in recent years, they have posed additional challenges to generic companies seeking to replicate them. Wockhardt, for example, is now banned from exporting drugs to the United States that were manufactured in two Indian plants where F. Lever could not prove that the generic drugs were to blame. Austria-Codex in German 62nd ed. Lever and other critics of generic drugs say the agency needs to be more frank about the potential downsides to generics. The recalls are considered Class II, meaning they may cause temporary health problems but are unlikely to pose an immediate safety threat. Blood or plasma concentrations may be measured to confirm a diagnosis of overdose or poisoning in hospitalized patients or to assist in a medicolegal death investigation. Retrieved 22 March Neas also noted that generic companies supported a bill that increased funding through industry-generated user fees to scrutinize generic manufacturing, especially overseas. From Wikipedia, the free encyclopedia. Kelly, a spokesman for the F. View all New York Times newsletters. When he switched them back to the brand or to another generic the symptoms disappeared, he said. The number of recalled bottles is relatively small compared with the 38 million prescriptions for the drug, known generically as metoprolol succinate, that were filled in the United States in , according to the research firm IMS Health.
