Paxil made my sobriety possible. On 30 mg I was unable to have an orgasm. By the end of the second week, I no longer felt depressed. However I had some pretty severe side effects the entire time I was on it and dealt with it because I felt normal person otherwise. And I have always been slim. This medication slows your metabolism and there is no way of preventing it while you are on it. This medication is great but also horrible for weight gain. I took 10mg's daily for 30 days then was bumped up to 20mg's. The big catch and problem with this drug was that I gained 20 pounds in 2 years. The absence of a warning for a given drug or drug combination in no way should be construed to indicate that the drug or combination is safe, effective or appropriate for any given patient. Rated Paxil Paroxetine for Depression Report For me, 40mg Paxil had a dramatic positive effect on my depression with 48 hours. At the beginning I felt as if I was out of my own body.
