How Are They Different? This information can help you decide which drug may be a better choice for you. Learn about the side effects of these medications. Updated on January 29, See how aloe vera juice stacks up against acid reflux. That said, self-treatment with Prilosec is not recommended in children who are younger than 18 years. I have no idea how she pees at all since she drinks so little, but thank goodness she does. The formula situation is still horrible. Patient assistance programs PAPs are usually sponsored by pharmaceutical companies and provide free or discounted medicines to low income or uninsured and under-insured people who meet specific guidelines. Acid reflux symptoms are caused when stomach contents flow up from the stomach back into the esophagus, causing symptoms like heartburn, stomach pain. They both work by reducing the amount of acid in your stomach, but Prilosec and Zantac do so in different ways. She consistently drinks less than 10 ounces a day. These drugs are used to treat similar conditions, including: Must Reads for Moms. This material is provided for educational purposes only and is not intended for medical advice, diagnosis or treatment. A generic version of Zantac is available, see ranitidine prices. It apparently works before or after eating, any time of day. The generic versions tend to be cheaper than the brand-name versions. The problem with the Pepcid is twofold. H2 Receptor Blockers H2 receptor blockers can be used to treat conditions that cause excess stomach acid. How does Maximum Strength Zantac work? Jan 29, - We should be able to tell in a week or two if the infant Zantac is going to do as good a job as the Pepcid has been doing. Right now it's not a perfect situation, but I'll admit it is much better than before we started the antacid. I'm praying we don't have a relapse because the infant Zantac doesn't work.
