Just dump the powder in a shot glass of water, give it a stir and down it. But there is only 5mg of hydrocodone and mg of acetamaphine however you spell it. I'm not trying to sound like a dick, just trying to be realistic and say what works for me. Sign In or Register. Supply Chain Management Application. I also find parachuting kinda difficult personally. Available for Android and iOS devices. Which med is stronger? As far as parachuting goes, why not just crush it up and eat it like a bc powder? After I had a good sized line going, I rolled a bill and went for it, it burned a little bit in my nose. I got my payment, all was well plus I enjoyed the quick onset that I wasn't used to, for I had only taken them orally previously. We comply with the HONcode standard for trustworthy health information - verify here. So hopefully this explains what I meant better, I wasn't saying swallowing a tiny bit of TP is dangerous, just unnecessary in my opinion. View top members Find a member. Hydrocodone/acetaminophen (Vicodin, Lorcet, Lortab, Norco, Xodol, Hycet) is inexpensive drug used to treat moderate to severe pain. It is more popular than comparable drugs. It is available in multiple generic and brand versions. Generic hydrocodone/acetaminophen is covered by most Medicare and insurance plans, but.
