The advertising and marketing efforts of the pharmaceutical industry yield results even after the drug patents expire. About Us Spanish Sitemap. Generics account for about three quarters of US prescriptions, but brand name drugs account for about three quarters of spending. We do not buy or sell any statins or any other medicines. Authorized generics are the branded product sold without the trademarked name. A branded drug is supplied by only one manufacturer, while the generic versions of that drug may be supplied by many manufacturers. Generic drugs are copies of branded pharmaceutical products priced at a much lower level. Resistance Although there is no good evidence to believe otherwise, the feeling that generic drugs are not as good or effective as their brand name counterparts persists. Patents are usually valid for 20 years from their issuance. While some patients may claim or believe that there is a difference between branded and generic versions of the same drug, when clinical study participants are not aware of this distinction, the two versions perform equally across studies. The day exclusivity period does not apply to authorized generics. Generic Statins Generic drugs are copies of branded pharmaceutical products priced at a much lower level. Importing statins from other countries. Generic drug companies are able to sell their products at lower prices because they do not advertise their products to doctors or patients like many branded companies. Generic drugs are bioequivalent to the branded product, but they are not necessarily identical. Drawbacks to using Generic Statins? At this time, the widely prescribed statins simvastatin and atorvastatin aka Zocor and Lipitor are available in generic form, while rosuvastatin Crestor should become available in following the expiration of its patent in May Authorized generics may be sold by the branded company through a subsidiary or by a third party with a contractual relationship with the branded company. As a result, the amount of time before a generic version of any particular branded product is available varies based upon the product. The big maker of generic atorvastatin is Ranbaxy Laboratories."Statins" is a class of drugs that lowers the level of cholesterol in the blood by reducing the production of cholesterol by the liver. (The other source of cholesterol in the blood is dietary cholesterol.) Statins block the enzyme in the liver that is responsible for making cholesterol. This enzyme is called ?What are statins, and how ?What are the side effects of. Simvastatin, marketed under the trade name Zocor among others, is a lipid-lowering medication.
