The current doctor is not helping much it seems. She doesn't actually count my pills, but yes, she's extremely strict. Wiki Research Mission Statement Donate! I requested Lyrica and Clonidine because I've heard they are good replacements for benzos with less horrid WDs, and the doc flat out denied me Lyrica, but said that she'd give me Clonidine at our next appt in two weeks. There is absolutely no chance at getting Lyrica out of her, which is what I was really hoping for Results 1 to 14 of Can severely lower your heart rate. They worked okay for awhile, but seem to really do nothing after a week or so of taking them. It kinda helps with anxiety. I'd rather go to jail instead of hospital. Or suggestions in general? Originally Posted by paranoid android.
