Tell your veterinarian if your pet is being given aspirin; another NSAID such as etodolac, carprofen or piroxicam; an over the counter cough, cold, allergy or pain medication; furosemide; or warfarin. She is on maintenance now Date published: It is recommended per the manufacturer to stop giving Metacam and seek emergency veterinary medical attention; if any of the following allergic reactions occur such as difficulty breathing; swelling of the lips; tongue or face; hives ; muscle cramps, open sores in the mouth, seizures, abdominal cramping. Keep this medication away from children and pets. Is there a generic version of metacam. Do not use any of the other over-the-counter human pain medications, such as Tylenol, in pets. How should Metacam be given? Don't use in animals with heart, kidney, or liver disease. I just started my 19 pound dog on this medication. Contact the veterinarian if the pet has bloody, black or tarry stools, blood in vomit, swelling or rapid weight gain due to fluid retention, unusual fatigue or weakness, yellowing of the eyes, excessive itching, abdominal pain or tenderness as these symptoms could indicate serious side effects. He'll be 14 in four weeks and is running again like a pup!! Before taking any prescription or over the counter medications talk to the veterinarian or pharmacist. What happens if I overdose the pet on Metacam? Hello, Yes it is recommended that your dog eats before taking this medication. I dose her with the nsaid in the morning and Fairwinds Companion cbd tincture bacon flavor at evening meal. The safe use of Metacam in pregnant or nursing dogs has not been evaluated.
