Generic drugs, both over-the-counter and prescription medications, are very strictly regulated by the Food and Drug Administration's FDA rules for generics. Americans are spending a lot of money on aspirin. If pregnant or breast-feeding, ask a health professional before use. All prices for name-brand and generic drugs are taken from the CVS website. The placebo effect can give them a boost and research has shown that boost may be significant. In a CDC study of a rural Alabama community, investigators found that people resisted buying generics, even when they were strapped for cash. Such variation is usually inconsequential, with one exception: In case of overdose, get medical help or contact a Poison Control Center right away. If you have questions about the substances you are taking, check with your doctor, nurse or pharmacist. Healthcare workers people like your pharmacist and doctor, who should know a thing or two about the matter buy generics. These are signs of stomach bleeding.
