The patent assigns exclusive legal right to the inventor or patent holder, and may include entities such as the drug brand name, trademark, product dosage form, ingredient formulation, or manufacturing process A patent usually expires 20 years from the date of filing, but can be variable based on many factors, including development of new formulations of the original chemical, and patent infringement litigation. Osmolex ER Osmolex ER amantadine hydrochloride is a proprietary formulation of immediate release and Available for Android and iOS devices. If a study is submitted that demonstrates bioequivalence to a specific listed drug product, the generic product will be given the same three-character code as the reference listed drug it was compared against. To view content sources and attributions, please refer to our editorial policy. Print this page Add to My Med List. Products meeting necessary bioequivalence requirements. December 15, Strength s: The easiest way to lookup drug information, identify pills, check interactions and set up your own personal medication records. Drug Exclusivity Exclusivity is the sole marketing rights granted by the FDA to a manufacturer upon the approval of a drug and may run simultaneously with a patent. A Reference Listed Drug RLD is an approved drug product to which new generic versions are compared to show that they are bioequivalent. By designating a single reference listed drug as the standard to which all generic versions must be shown to be bioequivalent, FDA hopes to avoid possible significant variations among generic drugs and their brand name counterpart. In certain instances, a number is added to the end of the AB code to make a three character code i. Three-character codes are assigned only in situations when more than one reference listed drug of the same strength has been designated under the same heading. Exclusivity periods can run from days to seven years depending upon the circumstance of the exclusivity grant.
