Antidepressants may produce some side effects. People who purge after they take antidepressants may not get enough of the medicine into their blood. These drugs can also help people who have both depression and binge eating disorder. I can also cite ECT and the FDA's apparent continued effort to reclassify the devices and essentially remove the modality as a possibility. It may take several weeks for antidepressants to relieve symptoms associated with binge eating disorder, although they may become effective sooner. Fortunately I got on 23andme before the warning, and I got the complete package. Remember, the FDA regulates the marketing of treatments not the practice of medicine. In WW Hay Jr et al. So far no response from either Senator Franken or Senator Klobuchar. I am still unclear about what happened with Merital - it disappeared in a hurry. Mental Health Eating Disorders Reference. Bulimia nervosa, search date January I conclude that is a definite step in regulating medical practice when there is nobody left to refer patients to for ECT. They reserve the right to send this response indicating that you might not hear from them again. And more recently, 23andme. I think that gives you wiggle room. You should not take Wellbutrin if you currently have, or formerly had, an eating disorder. For some reason, people with a history of anorexia nervosa or bulimia seem to be more likely to experience Wellbutrin-related seizures. Do not take Wellbutrin if, within the past 14 days, you have taken a monoamine oxidase inhibitor. Sep 27, - Why is Wellbutrin contraindicated for patients with eating disorders? Hi all, I was wondering why specifically Wellbutrin is contraindicated for patients with e.d.? Is it just the weightloss side effect or does it make them worse? I currently have an ED-NOS-r diagnosis and am symptomatic, but also on mg. Bupropion (Includes Wellbutrin) - Seizure Disorders. Severe Potential Hazard, Moderate plausibility. Applies to: Seizures, Head Injury, Anorexia Nervosa, Bulimia, Diabetes Mellitus, Alcoholism, Drug Abuse/Dependence. The use of bupropion is contraindicated in patients with a seizure disorder. Bupropion may trigger. Wellbutrin, which goes by the generic name bupropion, is a medication used to treat depression and seasonal affective disorder. For people with anorexia, Wellbutrin may cause complications that worsen symptoms or create new health problems that aren't already present. If you have anorexia, make sure your doctor. Dec 9, - My goal is to get this contraindication taken out so it reflects current clinical practice and the experience of depressed patients with both a past history of an eating disorder or an eating disorder. If you are a person with that history or a psychiatrist who prescribes bupropion in the face of this contraindication. Contraindications Seizures: Bupropion should not be prescribed to individuals with epilepsy or other conditions that lower the seizure threshold, such as alcohol or benzodiazepine withdrawal, anorexia nervosa, bulimia, or active brain tumors. Seizure is the most controversial side effect of bupropion, and. Jan 26, - Bupropion (Wellbutrin) has also been found helpful in controlling bulimia nervosa symptomology, but has been associated with an increased risk for seizures, and is contraindicated for the treatment of bulimia nervosa and other eating disorders It is important to recognize that the use of antidepressants. Apr 15, - My pdoc has given me a script for bupropion. She said there is an increased risk of seizure (1, - this is not taking into account the additional risk of an eating disorder). Everything I read says its contraindicated if you have an eating disorder as the seizure risk is higher. I did not know this when we talked. Mar 12, - i have seen eating disorders listed as a contraindication for prescribing wellbutrin. have any of you encountered problems getting a prescription . i've been bulimic for 10 years and have had weight issues and disorderly eating for about 15yrs, and my psychiatrist put me on wellbutrin because i also suffer. A. Bupropion Bupropion HCl is contraindicated in patients with a current or prior diagnosis of bulimia or anorexia nervosa because of a higher incidence of seizures noted in such patients. asmi.
