Still, the results of the study could be partially attributed simply to the power of suggestion, Ubel said. The federal agency said enough prescriptions were being written by to supply every American adult with a bottle of pills. Doctors don't usually embrace requirements for prior authorization, Ransom said. With the new rules, officials want doctors to consider alternative painkillers, start with low doses, and better screen patients for abuse or risk. Under a policy that goes into effect in July, doctors in the program that serves one in five Marylanders will need prior authorization to write some prescriptions for the drugs. The challenge will be educating doctors before July, when all of Maryland's thousands of doctors will be required to register for the state's prescription drug monitoring program. McMahon said doctors who don't follow guidelines from the U. The actors described symptoms that suggest sciatica , or back and leg pain that could be caused by nerve damage. To determine whether patients could influence their doctors' prescribing practices, primary care physicians from six states viewed videos in which professional actors simulated a consultation with a primary care doctor. McMahon said it's not clear whether the CDC guidelines have yet influenced doctors' prescribing habits in Maryland, but the new rule should slow or deter the liberal prescription of opioids. Tiffany Wedlake, physician adviser in the state's Medicaid program, said all of the managed-care organizations that serve patients in Maryland signed on to the changes. Together, the findings suggest that some doctors are easily swayed by patients even when prescribing narcotics that are prone to abuse and that pharmaceutical advertisements targeted at patients may actually affect what doctors prescribe. Health officials say they're clamping down on excessive prescriptions for opioids in the state's Medicaid program part of a larger effort to curb runaway addiction that often begins with painkillers. Prescription writing is something that I used to worry so much about in my 3rd year of medical school. I probably killed a whole tree tearing up prescriptions that were wrong. Why did I worry so much about it? Prescription writing was not covered very well at my medical school. And with the amount of material that needs to be. Nov 21, - I recently hobbled to the drugstore to pick up painkillers after minor outpatient knee surgery, only to discover that the pharmacist hadn't yet filled the prescription. My doctor's order of 90 generic Percocet exceeded the number my insurer would approve, he said. I left a short time later with a bottle containing a.
