By reporting side effects you can help provide more information on the safety of this medicine. One of the commonest reasons for this to occur is because the bacteria causing the infection are resistant to the antibiotic that is being taken. Other medicines may also be given at the same time. You must tell your doctor urgently if you get: This material is provided for educational purposes only and is not intended for medical advice, diagnosis or treatment. You should not take an antibiotic unless it has been prescribed specifically for you and you should use it only to treat the infection for which it was prescribed. Do not take the next dose too soon, wait about 4 hours before taking the next dose. These can happen when having the medicine or for up to several weeks after. This means that they can survive and even multiply despite the antibiotic. Steglujan Steglujan ertugliflozin and sitagliptin is a sodium glucose co-transporter 2 SGLT2 inhibitor, and Questa modalita e stata progettata per aiutare i diversi tipi di navigazione. It is very important that you take the antibiotic at the right dose, at the right times and for the right number of days. General advice regarding the use of antibiotics Antibiotics are used to treat infections caused by bacteria.
